

T09	Digital Health Initiatives
<p>Advances in healthcare information technologies (HIT), electronic health (e-health), telemedicine, and mobile health (m-health) applications among many others have resulted in an ever increasing digitization of traditional healthcare delivery as well as individual management of one’s own health. Subsequently, this track seeks to focus on how information systems have created the electronic environment that serves as the global gateway for (1) healthcare professionals, (2) patients, and (3) non-healthcare profession caregivers. Clearly, professional healthcare providers are seeing dramatic shifts in how, when, and where services are delivered as well as to whom, while also changing the nature of healthcare professions as a whole. Providers are also seeing increased adoption and use of technology plays a greater role in all aspects of their work. Similarly, patients, and their caregivers, are beginning to see the growing use of information systems related to healthcare (1) transforming their ability to more actively participate in the management of their health and care delivery through advanced monitoring and sensing technologies; (2) enabling greater access to individual electronic medical records, detailed medical information from across the globe, and a growing pool of data related to evidence-based healthcare outcomes; (3) affording them access to previously unavailable knowledge and services through telemedicine and advanced communications technologies; and finally (4) enabling their growing access to support groups and knowledge sharing through social media initiatives. Patients are further extending their working years beyond past expectations while still seeing improvements in the quality of their personal life. Similarly, the growing electronic environment enabled by information systems within the healthcare sector affords caregivers ever-expanding options and opportunities to better serve loved ones, at a lower expense to their own work and daily lives.</p> <p>This track has a long term ambition and vision to improve healthcare all over the world. The steering committee exists of Wendy Robson and Ton Spil.</p>

Track Co-Chairs		
1	Name - Surname (primary contact)	Christian Guttman
	Title	PhD
	E-mail	guttman.public@gmail.com
	Affiliation	University of New South Wales, Australia Karolinska institutet, Sweden
	URL	http://ki.se/en/people/chrgut
	Short Biography	Christian Guttman (Adj. Associate Professor, Phd/MSc) is a researcher and technologist with strong research and communication skills. The focus of his research is on Health Care, Lifestyle & Well-Being. At BT, IBM, HP and successful startups, he led innovation teams/projects using analytics and AI, and social/mobile/IoT technology combined with behavioural economics. He creates high-impact systems, patents (>8 disclosures), and scientific publications (50+ articles and book editions). He enjoys working with great teams and partnerships.
2	Name - Surname	Richard Klein
	Title	PhD
	E-mail	rklein@FIU.edu
	Affiliation	Florida International University
	URL	business.fiu.edu/faculty/faculty_experts.cfm?FlagDirectory...kleinr
	Short Biography	Richard Klein is an Associate Professor of Information Systems and the Assistant Chair in the Department of Decision Sciences and Information Systems at Florida International University in Miami, Florida, U.S.A., where he also serves as the Academic Director of the Langdon Undergraduate School of FIU's College of Business. His research examines healthcare informatics and management systems, electronic business initiatives, in addition to inter-organizational systems. Dr. Klein has been published in top journals, including Decision Sciences, the European Journal of Information Systems, Information and Management, the Journal of Management Information Systems, MIS Quarterly, and the Journal of Operations Management. He additionally has over decade of industry

		experience with Automatic Data Process and First Data Corp.
3	Name - Surname	Reeva Lederman
	Title	PhD
	E-mail	reeva.lederman@unimelb.edu.au
	Affiliation	Melbourne University
	URL	http://www.cis.unimelb.edu.au/people/staff.php?person_ID=5168
	Short Biography	<p>Reeva Lederman is an Associate Professor in the Department of Computing and Information Systems at The University of Melbourne.</p> <p>Research interests</p> <ul style="list-style-type: none"> -Situated systems, -Affordances -Health information systems -Online Systems for Mental health, -Tangible Information Systems, -Online Health Communities.
